## EXPERIENCE

### Mantiq Infotech, Himmatnagar

JULY 2024 - DEC 2024

PHP Developer Trainee

- Initially I got familiar with the basics of PHP to the MVC architecture, code cleanliness, coding standards using PSR. I got excellent team members to guide me and upskill me.

#### ■ What I learned here:

- Writing efficient MySQL queries.
- Version control using Git (Github).
- Validation, Emails, Views, Query builder, Helpers, Libraries)
- Javascript & Jquery (DOM manipulation, Date & Time libraries etc)
- CSS, Bootstrap and Font icons

### Latitude Technolabs Private Limited, Ahmedabad

JAN 2025 - JUN 2025

PHP Laravel Developer Intern

- Gained hands-on experience in **Laravel framework** from basic to mid-level, working on real-world backend features and APIs.
- Improved skills in **JavaScript, AJAX, HTML, and CSS** through active frontend development and integration tasks.
- Learned the basics of **Craft CMS** and contributed to managing and updating client projects.
- Collaborated with teams and improved **professional communication skills** by participating in client discussions and internal meetings.

## PROJECTS

### Site Pro Project

- Created multiple **modules in master admin panel** using Laravel and Blade.
- Implemented and managed **frontend integration** using Bootstrap and jQuery.
- Handled CRUD operations, validations, and dynamic content rendering.

### Entertainment Kingdom Website

- Set up a **new Laravel project** from scratch.
- Converted **static HTML pages** into dynamic Laravel Blade views.
- Connected pages with **controllers, routes, and models** for dynamic data flow.

### Design Invites Project

- Developed **RESTful APIs for product listing and filtering**.
- Ensured response formatting, status codes, and authentication handling.
- Used Laravel Resources and Request Validation effectively.
